L16: Entry 5 of 9

File: USPT

Sep 5, 2000

DOCUMENT-IDENTIFIER: US 6115690 A

TITLE: Integrated business-to-business Web commerce and business automation system

Application Filing Date (1):19971222Detailed Description Text (11):

Referring now to FIG. 3, a block diagram is shown of a computing environment in which the present invention may be used. A Web-enabled, client/server relational database management system (DBMS) is provided storing a database including files belonging to different business domains, e.g. a products domain, a payments domain, a financial performance domain and a personnel domain. (The term "product" is used generically herein to refer to items sold and may be tangible goods, financial products, subscriptions--anything that may be bought and sold in a discrete transaction.) Also provided are code modules pertaining to each of the different domains. Customers and vendors may obtain access to the database through the Internet or the like. The physical location of the database therefore becomes irrelevant--the database can be everywhere in the world, either through wired communications or wireless communications. A firewall (or other security scheme, such as encryption, implemented in either hardware or software) may be provided between the Internet and the Web interface of the DBMS. Internal clients may be connected to the DBMS through a local area network (LAN) or through an intranet, using the Web interface.

Detailed Description Text (65):

Referring to FIG. 58, the manner in which various automation processes relate on an inter-domain basis may be appreciated. The products domain is represented in approximately the upper third of FIG. 58 and includes sales functions (5801) and shipping/receiving functions (5803). Purchasing and installation functions, now shown in FIG. 58, are shown in the microfiche appendix. The payments domain is represented in approximately the middle third of FIG. 58 and includes AP functions (5805), AR functions (5807) and return functions (5809). The financial performance domain is represented in approximately the lower third of FIG. 58 and has financial information automatically posted to it from the payments domain, as described more fully hereinafter. The personnel domain is not shown in FIG. 58 but draws upon information from the other domains in a manner described more fully hereinafter.

Detailed Description Text (213):

Referring to FIG. 114, there is shown a human resource infrastructure for a virtual organization performance evaluation model. All company personnel are linked to a digital "HR backbone," including operational management (VP.s, managers), engineering, strategic management (president), financial and legal personnel (CPA, lawyer), and staff within various departments (customer service, shipping/receiving, technical, accounting, purchasing, etc.). In concept, the HR backbone could be any information conduit. In an exemplary embodiment, the HR backbone is realized by the same integrated, Web-enabled, client/server database as described heretofore. Various functional blocks manipulate data stored within the database and form a personnel module.

Current US Cross Reference Classification (5):
705/8

CLAIMS:

77. An automated business process for product sales that uses a Web-enabled relational database management system to automate an integrated supply chain including a seller and a plurality of vendors, the process comprising the steps of:

a seller placing vendor orders and entering order information into the database, the orders being communicated to the vendors through a global computer network;

the seller receiving the orders in whole or in part and entering receiving information into the database;

the vendors accessing receiving information through the global computer network to ensure prompt receipt of orders;

the seller requesting return of selected order items; and

the vendors accessing return information through the global computer network and in response thereto communicating return merchandise authorization numbers to the seller through the global computer network.

The champion hurdler of Aldershot speaks out
(Owner of Abadine Ltd, a catering equipment shop, looks at inconveniences
and annoyances of running a small business)
Article Author(s): Durbridge, Phil
Housewares, p 14
September 1996

LANGUAGE: English RECORD TYPE: Fulltext; Abstract
WORD COUNT: 679

ABSTRACT:

Phil Durbridge enumerates the obstacles and hurdles in keeping his catering shop in business. These hurdles are: returns of value added tax (VAT) and big penalties which result from the inability to pay VAT on time; changing tax rules and more financial liabilities if these rules are not followed; visits from the National Insurance inspectors and the Health and Safety officer bringing with them books of rules that have to be strictly implemented; persistent people who recommend themselves as business rates and financial advisers; lack of assistance from the Enforcement Officer of the local council; pretense selling of services by credit control companies; and acquisition of certificates, permits and charts from government agencies. There are two main points contended. The first is that there are some companies that take weeks to deliver services while others take only a night or a maximum of 4 days. The second is when the client happens to order the wrong goods or when goods are delivered incorrectly, the goods are returned and are replaced. Suppliers often take weeks and even months to replace the goods returned to them.

TEXT:

Phil Durbridge reveals the hurdles he has had to overcome while running Abadine Ltd in Aldershot

Hampshire: Colin Jackson, eat your heart out, I'm a much better hurdler than you, and I could take that gold medal off of you any time I wanted, except my hurdles are different to yours.

It started in 1980 when I first opened my catering equipment shop covering not only a wide range of domestic and household items, but also commercial catering equipment and utensils, party disposables, sugar craft, and catering hire equipment. Catering fabrication manufacture came gradually over the next ten years.

My initial hurdles were to keep my bank manager happy with cash flow charts while also to keep stock flowing in and orders flowing out. Over the years other hurdles have appeared, they are:

photo omitted

1. VAT returns. Big penalties if they are not in on time.
2. The tax man. Also wants his pound of flesh, and is forever changing rules, so even accountants have a job keeping. Again, more financial penalties.
3. National Insurance inspectors who apparently call within every five year period. How clever I must have been, hiding myself in my high street shop without them finding me for 14 years.
4. The Health and Safety Officer from the local council, who also apparently calls within every five years, suddenly appearing out of the blue after 15 years with their "must do this" and "must do that" and their dozens of pamphlets and books of rules that must be "obeyed". Again, how clever of me to have concealed myself; perhaps I'm invisible.
photo omitted
5. Financial advisers, "Allied Crowbar" and the like who waste so much of my time. I try to be polite but can anyone tell me what part of "no" they don't understand.
6. The Enforcement Officer from the local council, who gave me undue pressure and hassle instead of giving me the help and assistance to overcome what were basically minor problems blown out of all proportions.

Why are so many "jobsworth" people employed by local authorities?
7. Business rates advisers. Rip-off merchants set up to rip me off. Usually the second word told to these people is "off"
8. Credit control companies. Now selling their "services" under all sorts of different guises. Again, the second word to these people is "off"

In addition to all these hurdles come the following:

- Health and safety policy
- Safety charts
- Employers' liability certificates
- VAT certificates
- Public liability certificates
- Company registration certificate
- Credit brokers licence

ALL MUST BE DISPLAYED OR PENALTIES MUST BE PAID.

And now the main bones of contention:

1. Goods inwards. Why do so many companies take so long to deliver? When some companies deliver overnight or within 3-4 days, why do others take 3-4 weeks! Are they taking the mickey, or just badly organised -- if so they don't deserve to be in business.

Some will blame us and say that we should pay sooner, etc, etc, but this is just a smoke screen to cover their inefficiency. If they are that busy, why not increase staff numbers.

2a. Credit notes. When we deliver wrong goods or the customer orders wrongly (or just changes his mind), we immediately re-stock and credit the goods. Maximum time from return of goods to customer's receipt of credit note: 2-3 days.

2b. But when I return goods to my suppliers (bar a few who are excellent) most take weeks and weeks, some even months, to send a credit note or replace the goods.

They blame BS5750 parts 1-99 and all other manner of things when the truth of the matter is that they leave it so long, hoping we will forget. Not me. I telephone every day until I receive a credit note or a replacement. I end up being unpopular, but I don't care, I know that I am right.

Despite the above, I still start at 7am every day because I enjoy what I do. And I couldn't work for an employer, as like most self-employed people I am probably unemployable.

Phil Durbridge
